INTRODUCTION

Extended abstracts should be written in a form that is shorter than the full text. Subtitles of the extended abstract should be composed from the sections of **introduction, method, findings and conclusion**. Extended abstract of the full paper shall be written with Times New Roman font, single line spacing and 11 font size. Extended abstracts can contain figures and tables.

Extended abstracts should be in a structure that explains the content of the declaration therefore the preparation phase of the said work. Page margins are formed regarding the A4 page size and are 2.5 cm wide from the right, left, top and bottom. End of the lines should be aligned to the right and there should be no syllable segmentation. **Extended abstracts should not exceed 2 pages including the references** and pages should not be numbered.

Current literature regarding the work subject should be examined and the differences of the said work from the past, similar works should be presented clearly in the introduction section.

METHOD

Equipment and method that have been used in the work must be stated clearly.

Please, inform the details from your data collection and how you analysed your data.

FINDINGS

The main findings should be presented in this section. If you have images or tables which were results from your research, they should be displayed in this section.

All the tables and images should be centered and numbered (e.g. Figure 1). Definitions should be placed above the figure or table.

Table 1. Table Header

CONCLUSION

This final section contains the discovers and impressions did in your research. Please present the limitations from your research and suggestion for future studies.

REFERENCES

Resources that have been presented in the text should be listed in alphabetical order. References that have been presented in the references list should be prepared in a format according to the reference type shown below:

If the reference is an article;

Pommiera, S., Chenub, D., Quintardb, M. ve Lefebvre, X., (2007). Modelling of moisture-dependent aerobic degradation of solid waste, *Waste Management*, 28, 7, 1188-1200

If the reference is a book;

Li, G., Hart, A. ve Gregory, J., (1998). Flocculation and sedimentation, 295, Technomics Press, Lancaster PA.

If the reference is a chapter of a book;

Blackburn, T., (1998). Flocculation and sedimentation in Li, G., Hart, A. ve Gregory, J., eds, *Physical Processes*, Technomics Press, 29-45, Lancaster PA.
